

Discussiones Mathematicae
Probability and Statistics 37 (2017) 5–5
doi:10.7151/dmps.1198

PREFACE

This issue of *Discussiones Mathematicae Probability and Statistics* is dedicated to Professor Roman Zmyslony on the occasion of his Jubilee, which took place on March 12, 2016. The present issue contains a Biography of Professor Roman Zmyslony, which highlights some of his most important achievements both at the personal and academic levels, as well as his human qualities, well expressed in his personal relations with students and colleagues, of whom he was always able to make good friends. The volume also comprises a number of papers in various topics which range from Extreme Value Theory to Likelihood based Inference and Financial Mathematics and Statistics. The guest-editors of the volume want to earnestly thank all the authors who contributed to the present volume.
